## Factor XIIIa Monoclonal Mouse Antibody (F13A1/1448)

## **Product Description**

This antibody recognizes a protein of 83 kDa, which is identified as Factor XIIIa. It has been identified in platelets, megakaryocytes, and fibroblast-like mesenchymal or histiocytic cells in the placenta, uterus, and prostate, monocytes and macrophages and dermal dendritic cells. Anti-factor XIIIa has been found to be useful in differentiating between dermatofibroma (almost all cases are positive), dermatofibrosarcoma protuberans (-/) and desmoplastic malignant melanoma (-). Anti-factor XIIIa positivity is also seen in capillary hemagioblastoma, hemangioendothelioma, hemangiopericytoma, xanthogranuloma, xanthoma, hepatocellular carcinoma, glomus tumor, and meningioma.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

**Stock status:** Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email <a href="mailto:order@biotium.com">order@biotium.com</a> to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 1448, Anti-Factor-XIIIa (F13A1/1448)

## Due donat estable oute

Product attributes				
Antibody number	#1448			
Antibody reactivity (target)	Factor-XIIIa			
Antibody type	Primary			
Host species	Mouse			
Clonality	Monoclonal			
Clone	F13A1/1448			
Isotype	IgG2b, kappa			
Molecular weight	83 kDa			
Synonyms	Coagulation factor XIII A chain; Coagulation factor XIII A1 polypeptide; Coagulation factor XIIIa; F13A; F13A; F13A1; Factor XIIIA; Fibrin slabilizing factor, A subunit; Fibrinoligase; FSF, A subunit; Protein-glutamine gamma-glutamyltransferase A chain; TGase; Transglutaminase A chain; Transglutaminase. plasma			
Human gene symbol	F13A1			
Entrez gene ID	2162			
SwissProt	P00488			
Unigene	335513			
Immunogen	Recombinant fragment of human Factor XIIIa protein (aa46-181) (exact sequence is proprietary)			
Antibody target cellular localization	Cytoplasmic, Secreted (extracellular)			
Verified antibody applications	IHC (FFPE) (verified), WB (verified)			
Species reactivity	Human
