

## NKX2.2 Monoclonal Mouse Antibody (NX2/1524)

## **Product Description**

Expression of NKX2.2 has been found in neuroendocrine tumors of the gut, making it a potential marker for the study of gastrointestinal neuroendocrine tumors. More recently, NKX2.2 protein was identified as a target of EWS-FLI-1, the fusion protein specific to Ewing sarcoma, and was shown to be differentially upregulated in Ewing sarcoma on the basis of array-based gene expression analysis. It acts as a valuable marker for Ewing sarcoma, with a sensitivity of 93% and a specificity of 89%, and aids in the differential diagnosis of small round cell tumors.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 1524, Anti-NKX2.2 (NX2/1524)

## Product attributes

Product attributes				
Antibody number	#1524			
Antibody reactivity (target)	NKX2.2			
Antibody type	Primary			
Host species	Mouse			
Clonality	Monoclonal			
Clone	NX2/1524			
Isotype	lgG1, kappa			
Molecular weight	40-50 kDa			
Synonyms	Homeobox protein NK-2 homolog B, NK2 transcription factor lik protein B, NK2 transcription factor related locus 2, NKX22, Nkx2b, tinman			
Human gene symbol	NKX2-2			
Entrez gene ID	4821			
SwissProt	O95096			
Unigene	516922			
Immunogen	Human recombinant NKX2.2 protein fragment (aa1-119) (exact sequence is proprietary)			
Antibody target cellular localization	Nucleus			
Verified antibody applications	IHC (FFPE) (verified)			
Species reactivity	Human			
Species reactivity Antibody application notes	Human Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with secondary antibody, Immunofluorescence: 1-2 ug/mL, Immunohistology (formalin) 1-2 ug/mL, Staining of formalin-fixed tissues requires boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 min, Flow Cytometry 0.5-1 ug/million cells/0.1 mL, Optimal dilution for a specific application should be determined by user			
	Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with secondary antibody, Immunofiluorescence: 1-2 ug/mL, Immunohistology (formalin )-1-2 ug/mL, Staining of formalin-fixed tissues requires boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 min, Flow Cytometry 0.5-1 ug/million cells/0.1 mL, Optimal dilution for a
