CD86 Recombinant Monoclonal Mouse Antibody (rC86/1146)

Product Description

This antibody recognizes a protein of 70 kDa, which is identified as CD86. CD86 is a type I transmembrane glycoprotein and a member of the immunoglobulin superfamily of cell surface receptors. It is expressed at high levels on resting peripheral monocytes and dendritic cells and at very low density on resting B and T lymphocytes. CD86 expression is rapidly upregulated by B cell specific stimuli with peak expression at 18 to 42 hours after stimulation. CD86, along with CD80/B71, is an important accessory molecule in T cell co-stimulation via its interaction with CD28 and CD152/CTLA4. Since CD86 has rapid kinetics of induction, it is believed to be the major CD28 ligand expressed early in the immune response. It is also found on malignant Hodgkin and Reed Sternberg (HRS) cells in Hodgkin's disease.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 2083, Anti-CD86 (rC86/1146)

Product attributes

| Antibody number | #2083 | | |
|---|--|--|--|
| Antibody reactivity (target) | CD86 | | |
| Antibody type | Primary | | |
| Host species | Mouse | | |
| Clonality | Recombinant Monoclonal | | |
| Clone | rC86/1146 | | |
| Isotype | IgG1, kappa | | |
| Molecular weight | 70 kDa | | |
| Synonyms | Activation B7-2 antigen; B lymphocyte activation antigen B72; CD28 antigen igand 2; CD28LG2; CLS1; CTLA-4 counter-receptor B7.2; Early T-cell co-stimulatory molecule 1; ETC-1; FUN-1; LAB72; Ly-58; MB7-2; TS/A-2 | | |
| Human gene symbol | CD86 | | |
| Entrez gene ID | 942 | | |
| SwissProt | P42081 | | |
| Unigene | 171182 | | |
| Immunogen | Recombinant full-length human CD86 protein | | |
| Antibody target cellular localization | Plasma membrane | | |
| Verified antibody applications | Flow (verified), IF (verified), IHC (FFPE) (verified) | | |
| Species reactivity | Human, Mouse, Rat | | |
| Antibody application notes | Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with secondary antibody, Immunohistology (formalin): 2-4 ug/mL for 30 minutes at RT, Staining of formalin-fixed tissues requires boiling tissue sections in 10 mM Tris buffer with 1 mM EDTA pH 9.0 for 10-20 minutes followed by cooling at RT for 20 minutes. | | |
| | Optimal dilution for a specific application should be determined by user | | |
| Positive control | | | |
