Mammaglobin Monoclonal Mouse Antibody (MGB1/2000)

Product Description

Mammaglobin is a 93 amino acid glycoprotein with homology to other secretoglobin-uteroglobin family members. It was originally identified as a breast cancer restricted biomarker by differential screening. Mammaglobin related to secretoglobin family that includes human uteroglobin and lipophilin. Mammaglobin antibody stains cytoplasm of normal breast epithelial cells as well as primary and metastatic breast carcinomas. Mammaglobin expression is absent in prostate, kidney, colon, rectum, small intestine, stomach, pancreas, lung, and thyroid tissues. Mammaglobin may be used as part of an immunohistochemical panel for determination of metastatic breast carcinoma and tumor of unknown primary origin.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 2000, Anti-Mammaglobin (MGB1/2000)

Product attributes				
Antibody number	#2000			
Antibody reactivity (target)	Mammaglobin			
Antibody type	Primary			
Host species	Mouse			
Clonality	Monoclonal			
Clone	MGB1/2000			
Isotype	IgG1, kappa			
Molecular weight	18 kDa			
Synonyms	Mammaglobin-1 (MGB1); Mammaglobin-A; Secretoglobin family 2A member 2 (SCGB2A2); SG2A2; UGB2			
Human gene symbol	SCGB2A2			
Entrez gene ID	4250			
SwissProt	Q13296			
Unigene	46452			
Immunogen	Recombinant full-length human Mammaglobin (SCGB2A2) protein			
Verified antibody applications	IHC (FFPE) (verified), WB (verified)			
Antibody target cellular	Secreted (extracellular)			
localization Species reactivity	Human			
Antibody application notes	Higher concentration may be required fo direct detection using primary antibody conjugates than for indirect detection with secondary antibody,			
	Immunohistology (formalin): 0.1-0.2 ug/ml. for 30 minutes at RT, Staining of formalin-fixed tissues requires boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 minutes followed by cooling at RT for 20 minutes, Optimal dilution for a specific application should be determined by user			
Positive control	Immunohistology (formalin): 0.1-0.2 ug/mL for 30 minutes at RT, Staining of formalin-fixed tissues requires boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 minutes followed by cooling at RT for 20 minutes, Optimal dilution for a specific application should			
Positive control Shipping condition	Immunohistology (formalin): 0.1-0.2 ug/mL for 30 minutes at RT, Staining of formalin-fixed tissues requires boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 minutes followed by cooling at RT for 20 minutes, Optimal dilution for a specific application should be determined by user			
	Immunohistology (formalin): 0.1-0.2 ug/mL for 30 minutes at RT, Staining of formalin-fixed tissues requires boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 minutes followed by cooling at RT for 20 minutes, Optimal dilution for a specific application should be determined by user SK-BR-3 cells or Breast Carcinoma			
Shipping condition	Immunohistology (formalin): 0.1-0.2 ug/mL for 30 minutes at RT, Staining of formalin-fixed tissues requires boiling tissue sections in 10 mM clitrate buffer, pH 6.0, for 10-20 minutes followed by cooling at RT for 20 minutes, Optimal dilution for a specific application should be determined by user SK-BR-3 cells or Breast Carcinoma Room temperature Store at 2 to 8 °C, Protect fluorescent conjugates from light, Note: store
