

# gp100 / Melanosome / PMEL17 / SILV **Monoclonal Mouse Antibody** (PMEL/2039)

## **Product Description**

Cytotoxic T lymphocytes (CTLs) recognize melanoma-associated antigens, which belong to three main groups. These groups include tumor-associated testis-specific antigens, melanocyte differentiation antigens and mutated or aberrantly expressed antigens, which are routinely used as markers to identify melanomas based on their binding to specific monoclonal antibodies. gp100, also designated ME20-M, ME20-S and PMEL 17, is classified as a melanocyte differentiation antigen and is expressed at low levels in normal cell lines and tissues, but is upregulated in melanocytes. gp100 is a highly glycosylated protein. It is also the product of proteolytic cleavage, which results in a secreted protein.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 2039, Anti-gp100 / Melanosome / PMEL17 / SILV (PMEL/2039)

## Product attributes

Product attributes				
Antibody number	#2039			
Antibody reactivity (target)	gp100, Melanosome, Pmel17, SILV			
Antibody type	Primary			
Host species	Mouse			
Clonality	Monoclonal			
Clone	PMEL/2039			
Isotype	IgG1, kappa			
Molecular weight	90-100 kDa			
Synonyms	95kDa melanocyte-specific secreted glycoprotein, M-beta; Melanocyte lineage specific antigen GP100; Melanocyte protein Pmel 17; Melanoma associated ME20 antigen; Melanosomal matrix protein17; Premelanosome protein (PMEL17); Secreted melanoma-associated ME20 antigen; SILV; Silver homolog			
Human gene symbol	SILV			
Entrez gene ID	6490			
SwissProt	P40967			
Unigene	95972			
Immunogen	Recombinant human SILV protein fragment (around aa 376-502) (exact sequence is proprietary)			
Verified antibody applications	IHC (FFPE) (verified), WB (verified)			
Antibody target cellular localization	Endoplasmic reticulum, Golgi apparatus			
Species reactivity	Human			
Species reactivity Antibody application notes	Human Higher concentration may be required for direct detection using primary antibody. conjugates than for indirect detection with secondary antibody. ELSA: 2-4 ug/m for coating order Ab without BSA, Immunohistology (formalin); 1-2 ug/mL for 30 minutes at RT, Staining of formalin-fixed tissues requires boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 minutes followed by cooling at RT for 20 minutes. Optimal dilution for a specific application should be determined by user
