## Endoglin / CD105 Monoclonal Mouse Antibody (ENG/3269)

## **Product Description**

CD105/Endoglin is a Type I membrane glycoprotein located on cell surfaces and is part of the TGF-beta receptor complex. This protein has been found on endothelial cells, activated macrophages, fibroblasts, and smooth-muscle cells. Endoglin has a role in the development of the cardiovascular system and in vascular remodeling. Its expression is regulated during heart development. CD105 is highly expressed in endothelial cells during tumor angiogenesis and inflammation, with weak or negative expression in vascular endothelium of normal tissues. Angiogenesis is a promising prognostic marker in a variety of tumors. Endoglin is a more specific and sensitive marker for tumor angiogenesis than CD31 or CD34, as it labels only newly-formed blood vessels and may serve as a prognostic marker for prostate adenocarcinoma, and cancers of the lung, stomach, breast, and brain. Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors. Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

<b>Product attributes</b>			
Antibody number	#3269		
Antibody reactivity	CD105, Endoglin		
(target) Antibody type	Primary		
Host species	Mouse		
Clonality	Monoclonal		
Clone	ENG/3269		
Isotype	lgG2b, kappa		
Molecular weight	84 kDa		
Synonyms	CD105; END; Endoglin; Eng; HHT1; S-endoglin		
Human gene symbol	ENG		
Entrez gene ID	2022		
SwissProt	P17813		
Unigene	76753		
Immunogen	Recombinant human Endoglin protein fragment (aa74-251) (exact sequence is proprietary)		
Antibody target cellular	Plasma membrane		
Verified antibody	IHC (FFPE) (verified)		
applications Species reactivity	Human		
A	Staining of formalin-fixed tissues requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95°C followed by cooling at RT for 20 minutes, Immunohistology (formalin): 1-2 ug/mL for 30 minutes at RT, Optimal dilution for a specific application should be determined by user		
Antibody application notes	requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95°C followed by cooling at RT for 20 minutes, Immunohistology (formalin): 1-2 ug/mL for 30 minutes at RT, Optimal dilution for a specific application should
