CD22 / BL-CAM Monoclonal Mouse Antibody (RFB4)

Product Description

Recognizes a protein of 130-140 kDa, identified as CD22 (also known as BL-CAM). CD22 expression is restricted to normal and neoplastic B cells and is absent from other haemopoietic cell types. In B-cell ontogeny, CD22 is first expressed in the cytoplasm of pro-B and pre-B cells, and on the surface as B cells mature to become IgD. It is not expressed by plasma cells, CD22 is found highly expressed in follicular mantle and marginal zone B-cells, and while germinal center B-cells are relatively weak. CD22 is a member of the immunoglobulin superfamily and serves as an adhesion receptor for sialic acid-bearing ligands expressed on erythrocytes and all leukocyte classes. It also associates with tyrosine kinases and play a role in signal transduction and B-cell activation.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 1594, Anti-BL-CAM/CD22 (RFB4)

Product attributes

Product attributes				
Antibody number	#1594			
Antibody reactivity (target)	BL-CAM, CD22			
Antibody type	Primary			
Host species	Mouse			
Clonality	Monoclonal			
Clone	RFB4			
Isotype	IgG1, kappa			
Molecular weight	130-140 kDa			
Synonyms	B-lymphocyte cell adhesion molecule (BL-CAM); B-cell receptor CD22; CD22; Lectin 2; Lyb8; Sialic acid-binding Ig-like lectin 2 (Siglec-2); SIGLEC2; T-cell surface antigen Leu-14			
Human gene symbol	CD22			
Entrez gene ID	933			
SwissProt	P20273			
Unigene	579691			
Immunogen	Human tonsil lymphocytes.			
Verified antibody applications	Flow (verified)			
Antibody target cellular localization	Plasma membrane			
	Human			
Species reactivity	Human			
Species reactivity Expected antibody applications	Human Flow, surface (published for clone), Functional studies (published for clone)
