## **CD162 Monoclonal Mouse Antibody** (PSGL1/1567)

## **Product Description**

CD162 glycoprotein functions as a high affinity counter-receptor for the cell adhesion molecules P-, E- and L-selectin expressed on myeloid cells and stimulated T lymphocytes. As such, this protein plays a critical role in leukocyte trafficking during inflammation by tethering of leukocytes to activated platelets or endothelia expressing selectins. This protein requires two post-translational modifications, tyrosine sulfation and the addition of the sialyl Lewis x tetrasaccharide (sl.ex) to its O-linked glycans, for its high-affinity binding activity. Aberrant expression of this gene and polymorphisms in this gene are associated with defects in the innate and adaptive immune response. Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

<b>Product attributes</b>			
Antibody number	#1567		
Antibody reactivity	CD162		
(target) Antibody type	Primary		
Host species	Mouse		
Clonality	Monoclonal		
Clone	PSGL1/1567		
Isotype	IgM, kappa		
Molecular weight	43-120 kDa		
Synonyms	CD162; CLA; Cutaneous lymphocyte associated antigen; P-selectin glycoprotein ligand 1; PSGL1; Selectin P ligand; SELPLG		
Human gene symbol	SELPLG		
Entrez gene ID	6404		
SwissProt	Q14242		
Unigene	591014		
Immunogen	Recombinant human SELPLG (CD162) protein		
Antibody target cellular	Plasma membrane		
	Human		
Species reactivity	Human		
	Human  For coating for ELISA, order Ab without BSA, Optimal dillution and staining procedure for a specific application should be determined by user, Recommended starting concentrations for titration are 1-2 ug/ml. for most applications, or 1 ug/million cells/100 uL for flow cytometry		
Species reactivity  Antibody application	For coating for ELISA, order Ab without BSA, Optimal dilution and staining procedure for a specific application should be determined by user, Recommended starting concentrations for titration are 1-2 ug/mL for most applications, or 1 ug/million cells/100 uL		
Species reactivity  Antibody application notes	For caating for ELISA, order Ab without BSA, Optimal dilution and staining procedure for a specific application should be determined by user, Recommended starting concentrations for titration are 1-2 ug/mL for most applications, or 1 ug/million cells/100 uL for flow cytometry		
Species reactivity  Antibody application notes  Positive control	For coating for ELISA, order Ab without BSA, Optimal dilution and staining procedure for a specific application should be determined by user, Recommended starting concentrations for titration are 1-2 ug/mL for most applications, or 1 ug/million cells/100 uL for flow cytometry  Jurkat cells. Tonsil.		
Species reactivity Antibody application notes  Positive control Shipping condition	For coating for ELISA, order Ab without BSA, Optimal dilution and staining procedure for a specific application should be determined by user, Recommended starting concentrations for titration are 1-2 ug/ml. for most applications, or 1 ug/million cells/100 uL for flow cytometry  Jurkat cells. Tonsil.  Room temperature  Store at 2 to 8 °C, Protect fluorescent conjugates from light, Note: store		
Species reactivity Antibody application notes  Positive control Shipping condition Storage Conditions	For coating for ELISA, order Ab without BSA, Optimal dilution and staining procedure for a specific application should be determined by user, Recommended starting concentrations for titration are 1-2 ug/ml. for most applications, or 1 ug/million cells/100 uL for flow cytometry  Jurkat cells. Tonsil.  Room temperature  Store at 2 to 8 °C, Protect fluorescent conjugates from light, Note: store BSA-free antibodies at -10 to -35 °C		
Species reactivity Antibody application notes  Positive control Shipping condition Storage Conditions  Regulatory status Antibody/conjugate	For coating for ELISA, order Ab without BSA, Optimal dilution and staining procedure for a specific application should be determined by user. Recommended starting concentrations for titration are 1-2 ug/ml. for most applications, or 1 ug/million cells/100 uL for flow cytometry  Jurkat cells. Tonsil.  Room temperature  Store at 2 to 8 °C, Protect fluorescent conjugates from light, Note: store BSA-free antibodies at -10 to -35 °C  For research use only (RUO)  Conjugates: 0.1 mg/mL in PBS/0.1% BSA/0.05% azide, HRP conjugates: 0.1 mg/mL in PBS/0.05% BSA/. purified: 0.2 mg/mL in PBS/0.05% BSA/. purified: 0.2 mg/mL in PBS/0.05% BSA/. Free: 1 mg/mL in PBS/0.05% BSA/. purified: 0.2 mg/mL in PBS/0.67% BSA/. Free: 1 mg/mL in PBS/0.67% BSA/. Purified. 9.8.4 Free: 1 mg/mL in PBS/0.67% BSA/. Prefied. 1.2 mg/mL in PBS/0.67% BSA/. Pr
