## Involucrin Recombinant Monoclonal Mouse Antibody (rIVRN/827)

## **Product Description**

Recognizes a protein of 66 kDa-170 kDa, identified as involucrin. In Western blotting of cultured human keratinocytes, this MAb reacts with a 120 kDa protein. It stains the involucrin in a variety of sizes: 170 kDa in MCF-7 cells, a doublet of ~115 kDa and 150 kDa in gorilla and owl monkey, 66 kDa in dog, and a doublet of 105 kDa in pig. Its epitope maps between codon 421-568 of human involucrin. Involucrin is expressed in a range of stratified squamous epithelia, including the cornea, which lacks a distinct cornified layer. In normal epidermis, it is first expressed in the upper spinous layers, and in keratinocyte cultures, all cells that have left the basal layer express it. Involucrin expression is altered in pathological conditions: in psoriasis and other benign epidermal hyperplasias, involucrin expression begins closer to the basal layer than normal; expression is abnormal in squamous cell carcinomas and premalignant lesions, and is reduced in severe dysplasias of the larynx and cervix.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the <u>CF® Dye Brochure</u> for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email <a href="mailto:order@biotium.com">order@biotium.com</a> to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 3640, Anti-Involucrin (rIVRN/827)

## Product attributes

Call us: 800-304-5357

Product attributes			
Antibody number	#3640		
Antibody reactivity (target)	Involucrin		
Antibody type	Primary		
Host species	Mouse		
Clonality	Recombinant Monoclonal		
Clone	rIVRN/827		
Isotype	IgG1, kappa		
Molecular weight	66-170 kDa		
Synonyms	IVL		
Human gene symbol	IVL		
Entrez gene ID	3713		
SwissProt	P07476		
Unigene	516439		
Immunogen	Recombinant human full-length Involucrin protein (IVRN)		
Verified antibody applications	IHC (FFPE) (verified)		
Antibody target cellular	Cytoplasmic		
localization			
localization Species reactivity	Dog, Gorilla, Human, Owl monkey, Pig
