Uroplakin 1A Monoclonal Mouse Antibody (UPK1A/2922)

Product Description

The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. This encoded protein is found in the asymmetrical unit membrane (AUM) where it can complex with other transmembrane 4 superfamily proteins. It may play a role in normal bladder epithelial physiology, possibly in regulating membrane permeability of superficial umbrella cells or in stabilizing the apical membrane through AUM/cytoskeletal interactions. The protein may also play a role in tumor suppression.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 2922, Anti-Uroplakin 1A (UPK1A/2922)

1A (UPK1A) protein (exact sequence is proprietary)			
Verified antibody IHC (FERE) (verified)	tin		
applications			
Antibody target cellular Plasma membrane localization			
Species reactivity Human			
Positive control Urinary Bladder.	Bladder.		
Shipping condition Room temperature			
$\begin{tabular}{lll} \textbf{Storage Conditions} & Store at 2 to 8 °C, Protect fluorescent conjugates from light, \\ Note: store BSA-free antibodies at -10 to -35 °C \\ \end{tabular}$			
Regulatory status For research use only (RUO)			
Antibody/conjugate formulation Conjugates: 0.1 mg/mL in PBS/0.1% BSA/0.05% azide, HRP conjugates: 0.1 mg/mL in PBS/0.05% BSA, Purified: 0.2 mg/m in PBS/0.05% BSA/0.05% BSA/0.05% BSA-free: 1 mg/mL PBS without azide			
Validated in protein array Monospecific			
Shelf life Guaranteed for at least 24 months from date of receipt when stored as recommended			
Product origin Product may contain either bovine serum albumin (BSA) from bovine serum (Bos taurus), or recombinant BSA produced in Chinese hamster ovary cells. Inquire for the specific lot.
