## VLDL Receptor Recombinant Monoclonal Rabbit Antibody (VLDLR/2896R)

## **Product Description**

VLDLR (very low density lipoprotein receptor) is a member of the LDL receptor gene family, which includes LDL receptor, LRP, megalin, VLDLR and ApoER2. The LDL receptor family is characterized by a cluster of cysteine-rich class A repeats, epidermal growth factor (EGF)-like repeats, YWTD repeats and an O-linked sugar domain. VLDLR associates with RAP (receptor associated protein) during receptor folding, and RAP facilitates the secretion of the extracellular region of VLDLR. VLDLR is thought to mediate the interaction of extracellular Reelin and cytosolic mDab1 (mammalian disabled protein), which activates a tyrosine kinase. This pathway regulates the migration of neurons along the radial glial fiber network during brain development.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

**Stock status:** Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email <a href="mailto:order@biotium.com">order@biotium.com</a> to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 2896, Anti-VLDL Receptor (VLDLR/2896R)

## Product attributes

Product attributes					
Antibody number	#2896				
Antibody reactivity (target)	VLDL Receptor				
Antibody type	Primary				
Host species	Rabbit				
Clonality	Recombinant Monoclonal				
Clone	VLDLR/2896R				
Isotype	IgG				
Molecular weight	143-161 kDa				
Synonyms	Very low-density lipoprotein receptor; VLDL receptor; VLDL-R; VLDLR				
Human gene symbol	VLDLR				
Entrez gene ID	7436				
SwissProt	P98155				
Unigene	370422				
Immunogen	Recombinant human VLDLR fragment from c-terminal				
Antibody target cellular localization	Plasma membrane				
Species reactivity	Human, Rat				
Antibody application notes	For coating for ELISA, order Ab without BSA, Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with secondary antibody. Optimal dilution and staining procedure for a specific				
	application should be determined by user, Recommended starting concentrations for titration are 1-2 ug/mL for most applications, or 1 ug/million cells/100 uL for flow cytometry				
Positive control	starting concentrations for titration are 1-2 ug/mL for most				
Positive control Shipping condition	slarting concentrations for titration are 1-2 ug/mL for most applications, or 1 ug/million cells/100 uL for flow cytometry  HeLa or U-251 cells. Pancreas, Cerebellum, Heart or Skeletal				
	slarting concentrations for titration are 1-2 ug/mL for most applications, or 1 ug/million cells/100 uL for flow cytometry  HeLa or U-251 cells. Pancreas, Cerebellum, Heart or Skeletal Muscle.				
Shipping condition	starting concentrations for titration are 1-2 ug/mL for most applications, or 1 ug/million cells/100 uL for flow cytometry  HeLa or U-251 cells. Pancreas, Cerebellum, Heart or Skeletal Muscle.  Room temperature  Store at 2 to 8 °C, Protect fluorescent conjugates from light,				
Shipping condition Storage Conditions	starting concentrations for titration are 1-2 ug/mL for most applications, or 1 ug/million cells/100 uL for flow cytometry  HeLa or U-251 cells. Pancreas, Cerebellum, Heart or Skeletal Muscle.  Room temperature  Store at 2 to 8 °C, Protect fluorescent conjugates from light, Note: store BSA-free antibodies at -10 to -35 °C				
Shipping condition Storage Conditions Regulatory status Antibody/conjugate	starting concentrations for titration are 1-2 ug/mL for most applications, or 1 ug/million cells/100 uL for flow cytometry  HeLa or U-251 cells. Pancreas, Cerebellum, Heart or Skeletal Muscle.  Room temperature  Store at 2 to 8 °C, Protect fluorescent conjugates from light, Note: store BSA-free antibodies at -10 to -35 °C  For research use only (RUO)  Conjugates: 0.1 mg/mL in PBS/0.05% BSA/0.05% azide, HRP conjugates: 0.1 mg/mL in PBS/0.05% BSA, Purified: 0.2 mg/mL in PBS/0.05% BSA/0.05% azide, Purified: 0.2 mg/mL in PBS/0.05% BSA/0.05% azide, Purified BSA-free: 1 mg/mL in
