Erythrocyte Specific Monoclonal Mouse Antibody (SFL23.6)

Product Description

Mouse Anti-Human Erythrocytes Clone SFL23.6 MAb is directed against an erythroid cell surface antigen. It shows a well-defined reactivity with cells of the erythroid lineage at all stages of maturation in the peripheral blood, bone marrow, and fetal liver. Non-erythroid lineages are negative by flow cytometry. Although the exact identity of the antigen has yet to be determined, it has been shown to be distinct from Glycophorin A. This MAb is useful in the diagnosis of erythroleukemia, identification of bone marrow erythroid precursors, gating erythroid nucleated precursor cells from malignant cells in bone marrow specimens. Catalog number key for antibody number 0105, Anti-Erythrocytes (SFL23.6)

Product attributes

Antibody number	#0105			
Antibody reactivity (target)	Erythrocytes			
Antibody type	Primary			
Host species	Mouse			
Clonality	Monoclonal			
Clone	SFL23.6			
Isotype	IgG2b, kappa			
Molecular weight	Not Known			
Synonyms	RBC, Red blood cells, Erythroid Marker, Erythrocyte specific protein			
Human gene symbol	Not Known			
Entrez gene ID	Not Known			
SwissProt	Not Known			
Unigene	Not Known			
Immunogen	Hepatocytes from a 20-22 week-old human fetus			
Antibody target cellular localization	Plasma membrane			
Species reactivity	Human			
Expected antibody applications	Flow, surface (published for clone), IF (published for clone)			
Antibody application notes	Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with			
	secondary antibody, Flow cytometry: 0.5-1 ug/million cells, Immunofluorescence: 0.5-1 ug/mL, Optimal dilution for a specific application should be determined by user			
Positive control	Immunofluorescence: 0.5-1 ug/mL, Optimal dilution for a specific			
Positive control Shipping condition	Immunofluorescence: 0.5-1 ug/mL, Optimal dilution for a specific application should be determined by user			
	Immunofluorescence: 0.5-1 ug/mL, Optimal dilution for a specific application should be determined by user RBC. Placenta.			
Shipping condition	Immunofluorescence: 0.5-1 ug/mL, Optimal dilution for a specific application should be determined by user RBC. Placenta. Room temperature Store at 2 to 8 °C, Protect fluorescent conjugates from light,			
Shipping condition Storage Conditions	Immunofluorescence: 0.5-1 ug/mL, Optimal dilution for a specific application should be determined by user RBC. Placenta. Room temperature Store at 2 to 8 °C, Protect fluorescent conjugates from light, Note: store BSA-free antibodies at -10 to -35 °C			
Shipping condition Storage Conditions Regulatory status Antibody/conjugate	Immunofluorescence: 0.5-1 'ug/mL,' Optimal dilution for a specific application should be determined by user RBC. Placenta. RBC. Placenta. Room temperature Store at 2 to 8 °C, Protect fluorescent conjugates from light, Note: store BSA-free antibodies at -10 to -35 °C For research use only (RUO) Conjugates: 0.1 mg/mL in PBS/0.05% BSA, Purified: 0.2 mg/mL in PBS/0.05% BSA, Durified; D.2 mg/mL in PBS/0.05% BSA, Durified; BSA-free: 1 mg/mL in PBS/0.05% BSA, Durified; BSA-free: 1 mg/mL in
