Prostate Specific Antigen Monoclonal Mouse Antibody (1A7)

Product Description

This antibody recognizes a single protein of 33-34 kDa, identified as the prostate specific antigen (PSA). This MAb is highly specific to PSA and stains prostatic secretory and ductal epithelium in both normal and neoplastic tissues. PSA is a chymotrypsin-like serine protease (kallikrein family) exclusively produced by the prostate epithelium, and abundant in seminal fluid. PSA can be detected in the sera of patients with prostatic carcinoma. It is predominantly complexed to a liver-derived serine protease inhibitor, alpha-1-antichymotrypsin (ACT). A higher proportion of serum PSA is complexed to ACT in prostate cancer than in benign prostate hyperplasia. This MAb makes an excellent pair with MAb A67-B/E3 for PSA tests. Catalog number key for antibody number 0926, Anti-Prostate Specific Antigen (1A7)

Product attributes

Product attributes				
Antibody number	#0926			
Antibody reactivity (target)	Prostate Specific Antigen			
Antibody type	Primary			
Host species	Mouse			
Clonality	Monoclonal			
Clone	1A7			
Isotype	IgG1, kappa			
Molecular weight	33-34 kDa			
Synonyms	Antigen, prostate-specific (APS), Gamma-seminoprotein, hK3, Kallikrein related peptidase 3, Kallikrein-3 (KLK3), KLK2A1, P-30 antigen, Semenogelase, Seminin			
Human gene symbol	KLK3			
Entrez gene ID	354			
SwissProt	P07288			
Unigene	171995			
Immunogen	PSA (p30) from human sperm plasma			
Antibody target cellular localization	Secreted (extracellular)			
Verified antibody applications	IHC (FFPE) (verified)			
Species reactivity	Cat, Human			
Antibody application notes	Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with secondary antibody, Immunohistochemistry (formalin-fixed): 0.5-1.0 ug/ml. for 30 minutes at RT, Flow cytometry: 0.5-1 ug/mllion cells, Immunofluorescence: 0.5-1 ug/ml, Staining of formalin-fixed tissues requires boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 minutes followed by cooling at RT for 20 minutes, Optimal dilution for a specific application should be determined by user			
	RT for 20 minutes, Optimal dilution for a specific application
