BCECF, AM Ester

BCECF, AM ester is membrane-permeant and thus can be loaded into cells via incubation. This product is a mixture of three molecular species, all of which are readily hydrolyzed by endogenous esterases into a single BCECF free acid form once they are in the cells.

Product attributes

Call us: 800-304-5357

CAS number	117464-70-7
Cell permeability	Membrane permeant
pKa	pKa 6.97
Indicator type	Ratiometric
Colors	Green
Excitation/Emission	508/530 nm (high pH) (after hydro

Product Description

BCECF, AM ester is membrane-permeant and thus can be loaded into cells via incubation. This product is a mixture of three molecular species, all of which are readily hydrolyzed by endogenous esterases into a single BCECF free acid form once they are in the cells. For more information on BCECF, see 51010.

- White solid soluble in DMSO and DMF
- Store at -20°C and protect from light, especially in solution
- MW: approx. 688
- [117464-70-7]

$$H_3CCOH_2COC$$
