## CD1b Monoclonal Mouse Antibody (100-1A5)

## **Product Description**

The mouse monoclonal antibody recognizes CD1b, a 44 kDa type I glycoprotein associated with beta2-microglobulin (Workshop IV; Code T015). It is expressed on dendritic cells, Langerhans cells, thymocytes, and T acute lymphoblastic leukemia cells. The CD1 multigene family encodes five forms of the CD1 T-cell surface glycoprotein in human, designated CD1A, 1B, 1C, 1D and 1E. CD1, a type 1 membrane protein, has structural similarity to the MHC class I antigen and has been shown to present lipid antigens for recognition by T lymphocytes. Constitutive endocytosis of CD1B molecules and the differential sorting of MHC class II from lysosomes separate peptide- and lipid antigen-presenting molecules during dendritic cell maturation. CD1B is also expressed in interdigitating cells.

This antibody is available purified with BSA/azide at 200 ug/mL, or BSA/azide-free at 1 mg/mL.

Catalog number key for antibody number 1044, Anti-CD1b (100-1A5)

## Product attributes

Call us: 800-304-5357

Product attributes	
Antibody number #1044	
Antibody reactivity (target) CD1b	
Antibody type Primary	
Host species Mouse	
Clonality Monoclonal	
<b>Clone</b> 100-1A5	
Isotype IgM, kappa	
Molecular weight 44 kDa	
Synonyms A1 domain; CD1B; Cortical thymocyte ar thymocyte antigen; Ly38; T cell surface of T6/Leu6	
Human gene symbol CD1B	
Entrez gene ID 910	
SwissProt P29016	
Unigene 1310	
Oligene 1010	
Immunogen Stimulated human leukocytes
