TAG-72 / CA72.4 Monoclonal Mouse Antibody (CA72/733)

Product Description

Recognizes an oncofetal antigen of 220 kDa, identified as a tumor-associated glycoprotein (TAG-72) with properties of a mucin. This MAb defines the mucin-carried sialylated-Tn epitope. TAG-72 is usually expressed by adenocarcinomas, but is negative in mesotheliomas. Studies have reported that this antibody has 80% sensitivity and 93% specificity for pulmonary adenocarcinoma. Therefore, TAG-72 is a useful marker to distinguish between mesothelioma and adenocarcinoma. However, false positive reactions can occur so results must be interpreted with the utmost caution. This antibody may be useful in the differentiation of non-small cell carcinomas from small cell carcinomas of the lung. The combined use of anti-TAG-72 and anti-GCDFP-15 is valuable in the diagnosis of apocrine carcinoma.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 0733, Anti-CA72.4 (CA72/733)

Product attributes				
Antibody number	#0733			
Antibody reactivity (target)	CA72.4, TAG-72			
Antibody type	Primary			
Host species	Mouse			
Clonality	Monoclonal			
Clone	CA72/733			
Isotype	IgG1, kappa			
Molecular weight	220 kDa			
Synonyms	CA72.4, Tumor associated glycoprotein 72			
Human gene symbol	tag-72			
Entrez gene ID	182875			
SwissProt	Not Known			
Unigene	Not Known			
Immunogen	Human CA72.4 protein			
Antibody target cellular localization	Cytoplasmic, Plasma membrane			
Verified antibody applications	IHC (FFPE) (verified)			
Species reactivity	Cow, Dog, Human, Rat			
Antibody application notes	Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with secondary antibody, Immunofluorescence: 1-2 ug/mL, Flow Cytometry 0.5-1 ug/million cells/0.1 mL			
Positive control				
	Jurkat cells, Breast or lung carcinoma.			
Shipping condition	Jurkat cells, Breast or lung carcinoma. Room temperature			
Shipping condition Storage Conditions	-
