CD282 / TLR2 Monoclonal Mouse Antibody (TLR2/221)

Product Description

This MAb reacts with human Toll-like receptor 2 (TLR2). It is a member of the Toll-like receptor (TLR) family, which plays a fundamental role in pathogen recognition and activation of innate immunity. TLRs are highly conserved from Drosophila to humans and share structural and functional similarities. They recognize pathogen-associated molecular patterns (PAMPs) that are expressed on infectious agents, and mediate the production of cytokines necessary for the development of effective immunity. The various TLRs exhibit different patterns of expression. This gene is expressed most abundantly in peripheral blood leukocytes, and mediates host response to Gram-positive bacteria and yeast via stimulation of NF-kappaB.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 0221, Anti-CD282 (TLR2/221)

Oradust attributes

Product attributes				
Antibody number	#0221			
Antibody reactivity (target)	CD282, TLR2			
Antibody type	Primary			
Host species	Mouse			
Clonality	Monoclonal			
Clone	TLR2/221			
Isotype	IgG2a, kappa			
Molecular weight	90 kDa			
Synonyms	CD282; Toll-like receptor 2 (TLR2); Toll/interleukin-1 receptor-like protein 4 (TIL4)			
Human gene symbol	TLR2			
Entrez gene ID	7097			
SwissProt	O60603			
Unigene	519033			
Immunogen	Recombinant human TLR2 protein			
Antibody target cellular localization	Plasma membrane			
Species reactivity	Dog, Human, Monkey			
Antibody application notes	For coating for ELISA, order Ab without BSA, Higher concentration may be required for direct detection using primar antibody conjugates than for indirect detection with secondary antibody, Optimal dilution and staining procedure for a specific application should be determined by user, Recommended starting concentrations for titration are 1-2 ug/mL for most applications, or 1 ug/million cells/100 uL for flow cytometry			
Positive control				
Positive control Shipping condition	applications, or 1 ug/million cells/100 uL for flow cytometry Normal human peripheral blood cells. Dendritic cells,
