CD31 / PECAM-1 Monoclonal Mouse Antibody (JC/70A)

Product Description

CD31 (PECAM-1) is a transmembrane glycoprotein member of the immunoglobulin supergene family of adhesion molecules. CD31 is expressed by stem cells of the hematopoietic system and is primarily used to identify and concentrate these cells for experimental studies as well as for bone marrow transplantation. Anti-CD31 has shown to be highly specific and sensitive for vascular endothelial cells. Staining of nonvascular tumors (excluding hematopoietic neoplasms) is rare. CD31 MAb reacts with normal, benign, and malignant endothelial cells which make up blood vessel lining. The level of CD31 expression can help to determine the degree of tumor angiogenesis, and a high level of CD31 expression may imply a rapidly growing tumor and potentially a predictor of tumor recurrence.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 0639, Anti-CD31 (JC/70A)

Cell/tissue expression

Product attributes				
Antibody number	#0639			
Antibody reactivity (target)	CD31, PECAM-1			
Antibody type	rimary			
Host species	Mouse			
Clonality	Monoclonal			
Clone	JC/70A			
Isotype	lgG1, kappa			
Molecular weight	~100 kDa (endothelium) and ~130 kDa (platelets)			
Synonyms	EndoCAM; PECA1; Platelet Endothelial Cell Adhesion Molecule 1; GPIIA'			
Human gene symbol	PECAM1			
Entrez gene ID	5175			
SwissProt	P16284			
Unigene	376675 & 514412			
Immunogen	Membrane preparation of a spleen from a patient with hairy cell leukemia			
Verified antibody applications	Flow (verified), IHC (FFPE) (verified), WB (verified)			
Antibody target cellular localization	Plasma membrane			
Species reactivity	Cynomolgus monkey, Human, Rabbit			
Antibody application notes	Immunohistology formalin-fixed 1-2 ug/mL, Staining of formalin-fixed tissues requires boiling tissue sections in 10 mM Tris with 1 mM EDTA, pH 9.0, for 10-20 min followed by cooling at RT for 20 minutes. Immunofluorescence 0.5-1 ug/mL, Flow			
	Cytometry 0.5-1 ug/million cells/0.1 mL, Western blotting 0.5-1.0 ug/mL, Does not react with rat or pig; others not known, Optimal dilution for a specific application should be determined by user			
Positive control	ug/mL, Does not react with rat or pig; others not known, Optimal			
Positive control Shipping condition	ug/mL, Does not react with rat or pig; others not known, Optimal dilution for a specific application should be determined by user			
	ug/mL, Does not react with rat or pig; others not known, Optimal dilution for a specific application should be determined by user Jurkat cells. Tonsil or Angiosarcoma.			
Shipping condition	ug/mL, Does not react with rat or pig; others not known, Optimal dilution for a specific application should be determined by user Jurkat cells. Tonsil or Angiosarcoma. Room temperature Store at 2 to 8 °C, Protect fluorescent conjugates from light,			
Shipping condition Storage Conditions	ug/mL, Does not react with rat or pig; others not known, Optimal dilution for a specific application should be determined by user Jurkat cells.
