## CD68 Monoclonal Mouse Antibody (C68/684 + KP1)

## **Product Description**

This antibody recognizes a glycoprotein of 110 kDa, which is identified as CD68. It is important for identifying macrophages in tissue sections. It stains macrophages in a wide variety of human tissues, including Kupffer cells and macrophages in the red pulp of the spleen, in lamina propria of the gut, in lung alveoli, and in bone marrow. It reacts with myeloid precursors and peripheral blood granulocytes. It also reacts with plasmacytoid T cells, which are supposed to be of monocyte/macrophage origin. It shows strong granular cytoplasmic staining of chronic and acute myeloid leukemia and also reacts with rare cases of true histiocytic neoplasia. Lymphomas are negative or show few granules.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

**Stock status:** Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email <a href="mailto:order@biotium.com">order@biotium.com</a> to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 0685, Anti-CD68 (C68/684 KP1)

## Product attributes

Fiduuci ailiibules				
Antibody number	#0685			
Antibody reactivity (target)	CD68			
Antibody type	Primary			
Host species	Mouse			
Clonality	Monoclonal			
Clone	C68/684 + KP1			
Isotype	lgG's			
Molecular weight	~110 kDa			
Synonyms	GP110, LAMP4, Microsialin, Macrosialin, SCARD1, Scavenger Receptor Class D Member-1			
Human gene symbol	CD68			
Entrez gene ID	968			
SwissProt	P34810			
Unigene	647419			
Immunogen	Subcellular fraction of human alveolar macrophages (KP1); Recombinant human CD68 protein (C68/684)			
Antibody target cellular localization	Plasma membrane			
Verified antibody applications	IF (verified), IHC (FFPE) (verified)			
Species reactivity	Cat, Human, Monkey			
Antibody application notes	ug/mL, Immunohistology (formalin) 2-4 ug/mL, Staining of formalin-fixed tissues is enhanced by boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 minutes, Flow Cytometry 0.5-1 ug/million cells/0.1 mL, Optimal dilution for a specific application should be			
	secondary antibody, İmmunofluorescence (direct conjugate): 1-5 ug/mL, Immunohistology (formalin) 2-4 ug/mL, Staining of formalin-fixed tissues is enhanced by boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 minutes, Flow Cytometry 0.5-1 ug/million cells/0.1			
Positive control	secondary antibody, İmmunofluorescence (direct conjugate): 1-5 ug/mL, İmmunohistology (formalin) 2-4 ug/mL, Staining of formalin-fixed tissues is enhanced by boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 minutes, Flow Cytometry 0.5-1 ug/million cells/0.1 mL, Optimal dilution for a specific application should be			
Positive control Shipping condition	secondary antibody, İmmunofluorescence (direct conjugate): 1-5 ug/mL, İmmunohistology (formalin) 2-4 ug/mL, Staining of formalin-fixed tissues is enhanced by boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 minutes, Flow Cytometry 0.5-1 ug/million cells/0.1 mL, Optimal dilution for a specific application should be determined by user			
	secondary antibody, İmmunofluorescence (direct conjugate): 1-5 ug/mL, İmmunohistology (formalin) 2-4 ug/mL, Staining of formalin-fixed tissues is enhanced by boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 minutes, Flow Cytometry 0.5-1 ug/million cells/0.1 mL, Optimal dilution for a specific application should be determined by user  Tonsil, lymph node, or spleen
