CD34 Monoclonal Mouse Antibody (HPCA1/763)

Product Description

This MAb recognizes a single chain, transmembrane, heavily glycosylated protein of 90-120 kDa, which is identified as CD34. Its expression is a hallmark for identifying pluripotent hematopoietic stem or progenitor cells. Its expression is gradually lost as lineage committed progenitors differentiate. CD34 is a marker of choice for staining blasts in acute myeloid leukemia. In addition, CD34 is expressed by soft tissue tumors, such as solitary fibrous tumor and gastrointestinal stromal tumor. Its expression is also found in vascular endothelium. Additionally, it appears that proliferating endothelial cells express this molecule more than the non-proliferating endothelial cells. Anti-CD34 labels > 85% of angiosarcoma and Kaposi's sarcoma, but with a lower specificity. Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors. Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biofium.com to inquire about stock status and lead times before placing your order. Catalog number key for antibody number 0763, Anti-CD34 (HPCA1/763)

Product attributes				
Antibody number	#0763			
Antibody reactivity	CD34			
(target) Antibody type	Primary			
Host species	Mouse			
Clonality	Monoclonal			
Clone	HPCA1/763			
Isotype	IgG1, kappa			
Molecular weight	90-110 kDa			
Synonyms	Hematopoietic Progenitor Cell Antigen, HPCA1, Mucosialin			
Human gene symbol	CD34			
Entrez gene ID	947			
SwissProt	P28906			
Unigene	374990			
Immunogen	Recombinant full-length human HPCA1 protein			
Antibody target cellular	Plasma membrane			
Verified antibody applications Species reactivity	IHC (FFPE) (verified)			
	Human			
Antibody application notes	ug/mL, Staining of formalin-fixed tissues is enhanced by boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20			
	with secondary antibody, Immunofluorescence: 0.5-1 ug/mL, Immunohistology formalin-fixed 0.25-0.5 ug/mL, Staining of formalin-fixed tissues is enhanced by boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 minutes, Flow Cytometry 0.5-1 ug/millior cells/0.1 mL, Optimal dilution for a specific application should be			
Positive control	with secondary antibody, Immunofluorescence: 0.5-1 ug/mL, Immunohistology formalin-fixed 0.25-0.5 ug/mL, Staining of formalin-fixed tissues is enhanced by boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 minutes, Flow Cytometry 0.5-1 ug/millior cells/0.1 mL, Optimal dilution for a specific application should be			
Positive control Shipping condition	with secondary antibody, Immunofluorescence: 0.5-1 ug/mL, Immunohistology formalin-fixed 0.25-0.5 ug/mL. Staining of formalin-fixed tissues is enhanced by boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 minutes, Flow Cytometry 0.5-1 ug/millior cells/0.1 mL, Optimal dilution for a specific application should be determined by user
