## MHC-I Monoclonal Mouse Antibody (246-B8.E7)

## **Product Description**

Reacts with a monomorphic determinant of human major histocompatibility (MHC) class I antigens (HLA-A, B and C). Human MHC class I antigens are expressed constitutively on all nucleated cells lymphocytes such as lymphocytes, thymocytes, granulocytes, and bone marrow cells and are absent on erythrocytes. MHC class I antigens play a role in class I MHC-associated antigen presentation, inhibition of NK cell cytotoxicity, tumor surveillance, and tissue allotransplantation.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

**Stock status:** Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email <a href="mailto:order@biotium.com">order@biotium.com</a> to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 1054, Anti-MHC-I (246-B8.E7)

## Product attributes

Call us: 800-304-5357

Product attributes				
Antibody number	#1054			
Antibody reactivity (target)	ty (target) MHC-I			
Antibody type	Primary			
Host species	Mouse			
Clonality	Monoclonal			
Clone	246-B8.E7			
Isotype	IgG2a, kappa			
Molecular weight	~41 kDa			
Synonyms	HLA-A; HLA-B; HLA-C; HLA class 1A; HLA class 1B; HLA class 1C; Major histocompatibility complex, class I, A B C; MHC class I HLA-B; MHC class I HLA-C; MHC HLA-BC			
Human gene symbol	HLA-A			
Entrez gene ID	3105			
SwissProt	P01889; P30443; P30499			
Unigene	181244; 654404; 77961			
Immunogen	Human peripheral blood leukocytes			
Antibody target cellular localization	Plasma membrane			
Species reactivity	Human, Mouse, Non-human primates			
Species reactivity  Expected antibody applications	Human, Mouse, Non-human primates IF (published for clone)			
Expected antibody				
Expected antibody applications	IF (published for clone)  Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with secondary antibody, Immunofluorescence: 0.5-1 ug/mlL, Flow Cytometry 0.5-1 ug/mllilion cells/0.1 mL, Optimal dilution for a
