IGF-1 Monoclonal Mouse Antibody (M23)

Product Description

This antibody is specific to Insulin-like Growth Factor (IGF-1) and shows minimal cross-reaction with IGF-11, Proinsulin, MSF, and Insulin. IGF-1 is a polypeptide growth factor with two isoforms that are produced by alternative splicing. Isoform 1 is also known as IGF-IB while isoform 2 is known as IGF-IA. IGF-1 stimulates the proliferation of a wide range of cell types including muscle, bone and cartilage tissue. It functions as an autocrine regulator of growth. Activation of IGF system has emerged as a key factor for tumor progression and resistance to apoptosis in many cancers like those of breast, thyroid and colon.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 0220, Anti-IGF-1 (M23)

Product attributes

Call us: 800-304-5357

Product attributes				
Antibody number	#0220			
Antibody reactivity (target)	IGF-1			
Antibody type	Primary			
Host species	Mouse			
Clonality	Monoclonal			
Clone	M23			
Isotype	IgG1, kappa			
Molecular weight	~7.6 kDa			
Synonyms	Insulin-like Growth Factor IA (IGF-IA); Insulin-like Growth Factor IB (IGF-IB); Mechano Growth Factor (MGF); Somatomedin-C			
Human gene symbol	IGF1			
Entrez gene ID	3479			
SwissProt	P05019			
Unigene	160562			
Immunogen	Purified human IGF-1 protein			
Antibody target cellular localization	Secreted (extracellular)			
Species reactivity	Human, Mouse, Rabbit, Rat			
Species reactivity Expected antibody applications	Human, Mouse, Rabbit, Rat IHC (FFPE) (published for clone), WB (published for clone)			
Expected antibody				
Expected antibody applications	IHC (FFPE) (published for clone), WB (published for clone) Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with secondary antibody, Immunofluorescence: 1-2 ug/mL, Flow Cytometry 0.5-1 ug/million cells/0.1 mL, Optimal dilution for a
