Laminin Monoclonal Rat Antibody (A5)

Product Description

Laminins are large hetero-trimeric, non-collagenous glycoproteins composed of α , β , and γ chains. This MAb reacts with laminin B2/1 chain of ~210 kDa and does not cross-react with other basement membrane components or fibronectin. Its specificity was established by immunoprecipitation and immunofluorescence of human skeletal muscle and kidney with laminin chain-specific MAbs. Epithelial sheets in vivo are separated from the mesenchymal elements of the stroma by a thin layer of a specialized type of extracellular matrix termed the basement membrane (BM). This structure consists of individual components, some of which are ubiquitous in BMs and some are not. The ubiquitous ones comprise laminin (LN), entactin/nidogen (EN), collagen type IV (CIV), and large heparan sulfate proteoglycan (HSPG), which interact specifically with each other to form a continuous and regular BM. Alterations of BM integrity, from local discontinuities up to complete loss, are described in many types of human and animal epithelial neoplasms. This MAb stains uniformly all human and murine basement membranes

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 0308, Anti-Laminin (A5)

Product attributes

| Product attributes | | |
|---|--|--|
| Antibody number | #0308 | |
| Antibody reactivity (target) | Laminin | |
| Antibody type | Primary | |
| Host species | Rat | |
| Clonality | Monoclonal | |
| Clone | A5 | |
| Isotype | IgG2a, kappa | |
| Molecular weight | 210 kDa | |
| Synonyms | gG2a, kappa 1:10 kDa AMB2; LAMC1; Laminin B2 chain; Laminin gamma 1; Laminin mmma 1 chain AMC1 1:915 1:1047, Q5VYE7 & Q6NVY8 1:09663 Murine EHS laminin preparation Extracellular matrix HC (FFPE) (verified) Human, Mouse For coating for ELISA, order Ab without BSA, Higher concentration may be required for direct detection using primary mitibody conjugates than for indirect detection with secondary untibody, Optimal dilution and staining procedure for a specific pplication should be determined by user, Recommended tatring concentrations for tiration are 1:2 ug/ml for most upplications, or 1 ug/million cells/100 uL for flow cytometry, staining of formalin-fixed tissues requires heating tissue section 1 formM Tris with 1 mM EDTA, pH 9.0, for 45 min at 95°C | |
| Human gene symbol | LAMC1 | |
| Entrez gene ID | 3915 | |
| SwissProt | P11047, Q5VYE7 & Q6NVY8 | |
| Unigene | 609663 | |
| Immunogen | Murine EHS laminin preparation | |
| Antibody target cellular localization | Extracellular matrix | |
| Verified antibody applications | IHC (FFPE) (verified) | |
| Species reactivity | Human, Mouse | |
| Antibody application notes | For coating for ELISA, order Ab without BSA, Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with secondary antibody, Optimal dilution and staining procedure for a specific application should be determined by user, Recommended starting concentrations for titration are 1-2 ug/mL for most applications, or 1 ug/million cells/100 uL for flow cytometry, Staining of formalin-fixed tissues requires heating tissue sections in 10mM Tris with 1mM EDTA, pH 9.0, for 45 min at 95°C followed by cooling at RT for 20 minutes | |
| Positive control | | |
| | Normal colon or carcinomas | |
| Shipping condition | Normal colon or carcinomas Room temperature | |
