HER-2 / CD340 Monoclonal Mouse Antibody (HRB2/718)

Product Description

Recognizes a protein of 185 kDa, which is identified as c-erbB-2/HER-2/neu. Its epitope is localized in the extracellular domain. C-erbB-2/HER-2 is a member of the EGFR family. This MAb is specific and shows minimal cross-reaction with other members of the EGFR-family. Receptors of this family are located on the plasma membrane and consist of an extracellular ligand-binding domain that is connected to a large intracellular domain by a single transmembrane sequence. c-erbB-2/HER-2 protein is over-expressed in a variety of carcinomas especially those of breast and ovary.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 0718, Anti-CD340 (HRB2/718)

Product attributes

Product attributes			
Antibody number	#0718		
Antibody reactivity (target)	c-ErbB-2, CD340, HER-2, Neu		
Antibody type	Primary		
Host species	Mouse		
Clonality	Monoclonal		
Clone	HRB2/718		
Isotype	IgG1, kappa		
Molecular weight	185 kDa		
Synonyms	p185, CD340, Verb b2 Erythroblastic Leukemia Viral Oncogene Homolog 2, Neuro/Glioblastoma Derived Oncogene Homolog		
Human gene symbol	ERBB2		
Entrez gene ID	2064		
SwissProt	P04626		
Unigene	446352		
Immunogen	Recombinant extracellular domain of human HER-2 protein		
Verified antibody applications	Flow (verified), IF (verified)		
Antibody target cellular localization	Plasma membrane		
Species reactivity	Human		
Species reactivity Antibody application notes	Human Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with secondary antibody, Immunofluorescence: 0.5-1 ug/mlL, Flow Cytometry 0.5-1 ug/mllL ocl
