CD28 Monoclonal Mouse Antibody (C28/77)

Product Description

Recognizes a glycoprotein of 44-88 kDa, which is identified as CD28. It is the critical T-cell co-stimulatory receptor which provides to the cell the important second activation signal by binding CD80 and CD86 that are expressed by antigen presenting cells. Besides its co-stimulation role, CD28 functions in preventing T-cells from anergic hyporesponsive state or from undergoing premature apoptotic cell death. CD28 is also expressed on human fetal NK cells and some NK cell lines, whereas on murine NK cells the CD28 expression is much broader.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 0077, Anti-CD28 (C28/77)

Droduct attributes

Product attributes			
Antibody number	#0077		
Antibody reactivity (target)	CD28		
Antibody type	Primary		
Host species	Mouse		
Clonality	Monoclonal		
Clone	C28/77		
Isotype	IgG1, kappa		
Molecular weight	44 kDa (monomer); 88 kDa (dimer)		
Synonyms	T-cell-specific surface glycoprotein CD28; Tp44		
Human gene symbol	CD28		
Entrez gene ID	940		
SwissProt	P10747		
Unigene	591629		
Immunogen	Recombinant human CD28 protein		
Antibody target cellular localization	Plasma membrane		
Species reactivity	Human		
Antibody application notes	For coating for ELISA, order Ab without BSA, Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with secondary antibody, Optimal dilution and staining procedure for a specific application should be determined by user, Recommended starting concentrations for titration are 1-2 ug/mL for most applications, or 1 ug/million cells/100 uL for flow cytometry		
Positive control			
Positive control Shipping condition	applications, or 1 ug/million cells/100 uL for flow cytometry		
	applications, or 1 ug/million cells/100 uL for flow cytometry Jurkat cells or human lymph nodes and tonsils.		
Shipping condition	applications, or 1 ug/million cells/100 uL for flow cytometry Jurkat cells or human lymph nodes and tonsils. Room temperature Store at 2 to 8 °C, Protect fluorescent conjugates from light,		
Shipping condition Storage Conditions	applications, or 1 ug/million cells/100 uL for flow cytometry Jurkat cells or human lymph nodes and tonsils. Room temperature Store at 2 to 8 °C, Protect fluorescent conjugates from light, Note: store BSA-free antibodies at -10 to -35 °C Guaranteed for at least 24 months from date of receipt when		
Shipping condition Storage Conditions Shelf life	applications, or 1 ug/million cells/100 uL for flow cytometry Jurkat cells or human lymph nodes and tonsils. Room temperature Store at 2 to 8 °C, Protect fluorescent conjugates from light, Note: store BSA-free antibodies at -10 to -35 °C Guaranteed for at least 24 months from date of receipt when stored as recommended
