

## Cyclin D1 Monoclonal Mouse Antibody (DCS-6)

## **Product Description**

Recognizes a protein of 36 kDa, identified as cyclin D1. Cyclin D1, one of the key cell cycle regulators, is a putative proto-oncogene overexpressed in a wide variety of human neoplasms. This antibody neutralizes the activity of cyclin D1 in vivo. About 60% of mantle cell lymphomas (MCL) contain a t(11; 14)(q13; q32) translocation resulting in over-expression of cyclin D1. This antibody is useful in identifying mantle cell lymphomas (cyclin D1 positive) from CLL/SLL and follicular lymphomas (cyclin D1 negative). About 40% of breast carcinomas are positive for Cyclin D1. Occasionally, hairy cell leukemia and plasma cell myeloma weakly express Cyclin D1.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the <u>CF® Dye Brochure</u> for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email <u>order@biotium.com</u> to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 0007, Anti-Cyclin D1 (DCS-6)

| Antibody number   | #0007   |
|---|---|
| Antibody reactivity (target)  | Cyclin D1   |
| Antibody type   | Primary   |
| Host species  | Mouse   |
| Clonality   | Monoclonal  |
| Clone   | DCS-6   |
| Isotype   | IgG2a, kappa  |
| Molecular weight  | 36 kDa  |
| Synonyms  | B cell CLL/lymphoma 1; B cell leukemia 1; B-cell lymphoma 1<br>protein; BCL-1 oncogene; CCND1 protein; CCND1/FSTL3<br>fusion gene; CCND1/IGHG1 fusion gene CCND1/IGLC1 fusion<br>gene; CCND1/PTH fusion gene; G1/S-specific cyclin-D1;<br>Parathyroid adenomatosis 1; PRAD1 oncogene  |
| Human gene symbol   | CCND1   |
| Entrez gene ID  | 595   |
| SwissProt   | P24385  |
| Unigene   | 523852 & 667996   |
| Immunogen   | Human full length recombinant cyclin D1 protein   |
| Verified antibody<br>applications   | Flow (intracellular) (verified), IHC (FFPE) (verified), WB (verified)   |
| Antibody target cellular<br>localization  | Nucleus   |
