## CD20 Monoclonal Mouse Antibody (IGEL/773)

## **Product Description**

Recognizes a protein of 30-33 kDa, which is identified as CD20. It is a non-Ig differentiation antigen of B-cells and its expression is restricted to normal and neoplastic B-cells, being absent from all other leukocytes and tissues. CD20 is expressed by pre B-cells and persists during all stages of B-cell maturation but is lost upon terminal differentiation into plasma cells. This MAb can be used for immunophenotyping of leukemia and malignant cells, B lymphocyte detection in peripheral blood and B cell localization in tissues. It reacts with the majority of B-cells present in peripheral blood and lymphoid tissues and their derived lymphomas. In lymphoid tissue, germinal center blasts and B-immunoblasts are particularly reactive. It is a reliable antibody for ascribing a B-cell phenotype in known lymphoid tissues. Rarely, CD20-positive T-cell lymphomas have been reported. Reactivity has also been noted with Reed-Sternberg cells in cases of Hodgkin's disease, particularly of lymphocyte predominant type.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email <a href="mailto:order@biotium.com">order@biotium.com</a> to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 0773, Anti-CD20 (IGEL/773)

## Product attributes

| Product attributes                    |   |  |  |  |
|---------------------------------------|---|--|--|--|
| Antibody number                       | #0773   |  |  |  |
| Antibody reactivity (target)          | CD20  |  |  |  |
| Antibody type                         | Primary   |  |  |  |
| Host species                          | Mouse   |  |  |  |
| Clonality                             | Monoclonal  |  |  |  |
| Clone                                 | IGEL/773  |  |  |  |
| Isotype                               | IgG2a, kappa  |  |  |  |
| Molecular weight                      | 33-37 kDa   |  |  |  |
| Synonyms                              | APY; ATOPY; B-lymphocyte cell-surface antigen B1; Bp35; Fc epsilon receptor I beta chain; Fc Fragment of IgE high affinity I receptor for beta polypeptide; FCER1B; High affinity immunoglobulin epsilon receptor subunit beta; IgE Fc receptor subunit beta; IgEL; IGER; IGHER; LEU16; Leukocyte surface antigen Leu-16; Ly44; Membrane spanning 4 domains subfam A member 2; Membrane-spanning 4-domains subfamily A member 1 (MS4A1)   |  |  |  |
| Human gene symbol                     | MS4A1   |  |  |  |
| Entrez gene ID                        | 931   |  |  |  |
| SwissProt                             | P11836  |  |  |  |
| Unigene                               | 712553  |  |  |  |
| Immunogen                             | Recombinant human MS4A1 protein   |  |  |  |
| Antibody target cellular localization | Plasma membrane   |  |  |  |
| Verified antibody applications        | Flow (verified), IF (verified), IHC (FFPE) (verified)   |  |  |  |
| Species reactivity                    | Human   |  |  |  |
| Antibody application notes            | Higher concentration may be required for direct detection using primary antibody conjugates than for indirect detection with secondary antibody, Immunofluorescence: 0.5-1 ug/mL, Immunohistology formalin-fixed 0.5-1 ug/mL, Staining of formalin-fixed tissues requires boiling tissue sections in 10 mM citrate buffer, pH 6.0, for 10-20 min followed by cooling at RT for 20 minutes, Flow Cytometry 0.5-1 ug/million cells/0.1 mL, Optimal dilution for a specific application should be determined by user |  |  |  |
| Positive control                      | Daudi, Raji, and U266, and human lymphocytes. Lymph nodes and tonsils.  |  |  |  |
| Shipping condition                    | Room temperature  |  |  |  |
| Storage Conditions                    | Store at 2 to 8 °C, Protect fluorescent conjugates from light, Note: store BSA-free antibodies at -10 to -35 °C   |  |  |  |
| Shelf life                            | Guaranteed for at least 24 months from date of receipt when stored as recommended   |  |  |  |
| Regulatory status                     | For research use only (RUO)   |  |  |  |
| Antibody/conjugate formulation        | Conjugates: 0.1 mg/mL in PBS/0.1% BSA/0.05% azide, HRP conjugates: 0.1 mg/mL in PBS/0.05% BSA, Purified: 0.2 mg/mL in PBS/0.05% BSA/0.05% BSA-free: 1 mg/mL i PBS without azide   |  |  |  |
| Antibody research areas               | Immunology  |  |  |  |
| Product origin                        | Product may contain either bovine serum albumin (BSA) from bovine serum (Bos taurus), or recombinant BSA produced in Chinese hamster ovary cells. Inquire for the specific lot.   |  |  |  |
|                                       |   |  |  |  |
| Cell/tissue expression                | B-cells, Lymphocytes  |  |  |  |

Leukemia/lymphoma
