CD74 Monoclonal Mouse Antibody (LN-2)

Product Description

This antibody recognizes a protein of ~35 kDa, identified as CD74 (Workshop IV). CD74 is a type II transmembrane protein which binds to the peptide binding groove of newly synthesized MHC class II alpha/beta heterodimers and prevents their premature association with endogenous polypeptides. CD74 is expressed primarily by antigen presenting cells, such as B-lymphocytes (from before the pre-B cell stage to before the plasma cell stage), macrophages, and monocytes, and many epithelial cells. Anti-CD74 stains predominantly germinal center lymphocytes and B-cell lymphomas, but rarely T-cell lymphomas. Anti-CD74 has been shown to be useful in differentiating atypical fibroxanthoma (-) from malignant fibrous histiocytoma ().

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

Product attributes

Product attributes			
Antibody number	#0056		
Antibody reactivity (target)	CD74		
Antibody type	Primary		
Host species	Mouse		
Clonality	Monoclonal		
Clone	LN-2		
Isotype	IgG1, kappa		
Molecular weight	33-41 kDa		
Synonyms	CLIP; DHLAG; Gamma chain of class II antigens; HLA class II histocompatibility antigen gamma chain; HLA-DR antigens-associated invariant chain; HLADR-gamma (HLADG); la antigen-associated invariant chain; la-gamma; Major histocompatibility complex class II invariant chain; MHC HLA-DF gamma chain		
Human gene symbol	CD74		
Entrez gene ID	972		
SwissProt	P044233		
Unigene	436568		
Immunogen	SU-DHL-4 lymphoma cells		
Verified antibody applications	Flow (verified), IF (verified), IHC (FFPE) (verified)		
Antibody target cellular localization	Plasma membrane, Perinuclear		
Species reactivity	Baboon, Human, Mouse
