CD32 Monoclonal Mouse Antibody (8.7)

Product Description

This MAb reacts with a CD32 (FcgRII) epitope distinct from that defined by MAb 8.26 and the epitope overlaps with that of MAb 7.30 (cluster 4). It displays a stronger reaction with Daudi than with U937 cells. The epitope is located in domain 2 of FcgRIIa. Its Fab'2 fragments block immune complex binding. CD32 (FcgRII) is a type 1 transmembrane glycoprotein that mediates several functions including phagocytosis, cytotoxicity, and immunomodulation as well as platelet aggregation. Three genes (A, B, and C) encode CD32 and at least 6 isoforms are generated via alternative mRNA splicing, i.e., Ila1, Ila2, Ilb1, Ilb2, Ilb3 and Ilc. Monocytes/macrophages, placental trophoblasts and endothelial cells express all isoforms. In addition, the Ilb isoform is expressed by B cells, and the Ila isoform by platelets, granulocytes and, weakly, by B cells. NK cells and neutrophils express Isoform Ilc. CD32 binds weakly to the Fc region of monomeric IgG but more strongly to IgG aggregates and immune complexes.

Primary antibodies are available purified, or with a selection of fluorescent CF® dyes and other labels. CF® dyes offer exceptional brightness and photostability. See the CF® Dye Brochure for more information. Note: Conjugates of blue fluorescent dyes like CF®405S and CF®405M are not recommended for detecting low abundance targets, because blue dyes have lower fluorescence and can give higher non-specific background than other dye colors.

Stock status: Because Biotium offers a large number of antibody and conjugation options, primary antibody conjugates may be made to order. Typical lead times are up to one week for CF® dye and biotin conjugates, and up to 2-3 weeks for fluorescent protein and enzyme conjugates. Please email order@biotium.com to inquire about stock status and lead times before placing your order.

Catalog number key for antibody number 1079, Anti-CD32 (8.7)

Product attributes

Product attributes				
Antibody number	#1079			
Antibody reactivity (target)	CD32			
Antibody type	Primary			
Host species	Mouse			
Clonality	Monoclonal			
Clone	8.7			
Isotype	IgG1, kappa			
Molecular weight	40 kDa			
Synonyms	CD32A; Fc fragment of IgG low affinity lla receptor; Fc gamma Rlla; Fc-gamma Rlla; Fc-gamma-Rlla; FcGR2A; FcgRll; Fcr-2; FcRll-a; IGFR2: IgG Fc receptor Il-a; Low affinity immunoglobulin gamma Fc region receptor Il-a; Ly-17; Ly-m20; LyM-1; Lymphocyte antigen 17			
Human gene symbol	FCGR2A			
Entrez gene ID	2212			
SwissProt	P12318			
Unigene	352642			
Immunogen	K562 and FcgRII L cells			
Antibody target cellular localization	Plasma membrane			
	Human			
Species reactivity	Human
